Strategic action plan for the Warsaw Metropolis –
– Strategic Guidebook 2.0
Main objective:
A metropolis in balance

is a metropolis oriented towards sustainable socio-economic and spatial development. It is both complementary and diverse in terms of public services offered to residents and visitors, and in terms of personal development opportunities offered to residents, investors and visitors.

The Warsaw Metropolitan Area balance involves:
– Promoting sustainable development in the social, environmental and economic domains;
– Balancing the local and metropolitan dimension;
– Jointly meetings the most important needs of territorial units within the Metropolis, in consideration of the local means;
– Respecting diversity which allows the WMA to serve various functions that facilitate the satifsfaction of diversified residents’ needs.
Horizontal challenges of the Warsaw Metropolitan Area

1. Smart and integrated public transport and road networks
   - A cooperation platform coordinating the metropolitan transport policy
   - A functional system of interchange centres
   - High residents mobility thanks to an efficient transport infrastructure network

2. A green metropolis
   - High-quality air
   - Sustainable water management
   - An efficient waste management system
   - High-quality green public space
   - High environmental awareness

3. Integrated and attractive leisure opportunities
   - Attractive leisure opportunities in the metropolis
   - A metropolitan system of high-quality leisure infrastructure

4. Attractive conditions for entrepreneurship development and investment location
   - A joint investment portfolio
   - A favourable business climate in the metropolis

5. Modern social services ensuring the high quality of life for all residents
   - An efficient and coordinated use of high-quality social infrastructure
   - High-quality staff in social services
   - A diversified non-commercial dwellings portfolio tailored to the needs

Strategic workshops for representatives of the communes and counties forming the Warsaw Metropolis in its current shape served as the principal tool employed in the document creation process. The workshops have led to an extremely important conclusion: the internal diversification of the Warsaw Metropolitan Area does not pose a significant barrier to joint and efficient management, but constitutes its major resource.
